

R Code Files

RDWWSV64.R - R Code for the application – Please Use latest RDWWSV file

Excel CSV Files

Files generated from the Notes system

Export R WS 2019 -> ExportRWS2019.csv – current WS Export file

Export R DW 2019 -> ExportRDW2019.csv – current DW Export file

Export R 1000 2109 -> ExportR10002019.csv – current 1000 mile list (This file is no longer required)

Export R ABCD 2019 -> ExportRABCD2019.csv – Current WS ABCD cross listing (This file is no longer required)

Export R Weather >- ExportWeather2019.csv – Current Weather lists

Files generated from the official DW web site

DW official File -> DWSplitFull.csv – Lists times at checkpoints; generation from DW “Where is” File with additional computed columns. The modified Excel file is saved as CSV which converts formula to text.

Retirements0817.csv – Lists retirements by checkpoint

Files created in Excel from Notes data

FirstPlaceTimesj.csv – Lists DW winners

TestPlot2.csv – Relate weather to results

TestPlot3.csv – Relate weather to results

DWNumbers.csv – Numbers by DW Class

Template Files

SplitTimeTemplate.xlsx – Generates new columns for Split Time file -> DWSplitFull.csv file

DWTemplateCode.xlsx – Generates R CSV file from original DW results. Results need to be verified

WSTemplateCode.xlsx – Generates R CSV file from original WS results. Results need to be verified
